

Resource planner

Abstract

Resource planner is a web application through which we can work with administration and planning of employees in one company. Workers can belong to teams and also workers can have associated several projects they are working on.

Application

Resource planner is a web application, which doesn't need any type of installation. You only need a Web Browser. When you run this application, you will get next preview.

The initial interface of the Resource planner application. It features a dark header bar with a green 'Reports' tab and a 'Team(s)' label. Below the header is a large white rectangular area. A 'Filter' button is positioned at the top left of this area.

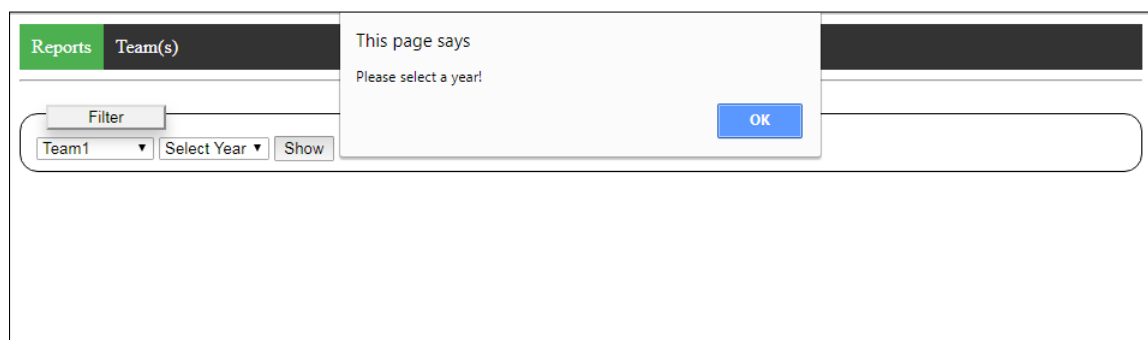

Here you have just one button (Filter Button). If you press this button, you will get two select menus (Select Team, Select Year) and one more button (Show).

The interface after clicking the 'Filter' button. The 'Filter' button is now highlighted with a blue border. Below it, two dropdown menus have appeared: 'Select Team' and 'Select Year', followed by a 'Show' button.

In first select menu, you have teams, which you can choose. In second menu, if you didn't choose team, you don't have anything. When you choose one team, in second menu you'll get several years, which you can choose.

If you press on Show button, but you didn't choose team or year or both, you'll get alert to choose it.

The interface with an alert dialog box. The 'Filter' button is still highlighted. The 'Select Team' dropdown now shows 'Team1'. The 'Select Year' dropdown is still empty. The 'Show' button is still present. An alert dialog box is displayed in the center, with the text 'This page says' and 'Please select a year!'. There is an 'OK' button on the right side of the dialog box.

When you choose both, team and year, and then press the Show button you'll get a table of selected team and year, with all workers from that team, and months of year.

Header of the table shows every Mondays of the selected month. First row shows how many days of week is worker available and other rows show projects and how much worker works on them. Last row shows a percentage which represents how much worker work on projects. Every cell we can edit, except header and footer. Also we can rename projects except first name (Available). We also have two buttons, x(close) button and save button. X(close) button will just close table

without saving. When we press the save button, all changes will be saved, and team table will be refresh. Also, if we enter some value to the table which is not a number, we will get alert.
